{experience}

Libera Web Design *Owner / Lead Designer*

2008 - now

I have been conceptualizing, designing, coding, and implementing custom websites, balancing multiple projects without sacrificing quality. I work closely with each client to ensure that sites are built to their specifications. I have consistently met deadlines, and left clients extremely satisfied.

NOTION Music, Inc. *Web Content Manager*

2007

I worked collaboratively with the marketing department and our marketing firm to create a new company website. My primary responsibility was to write content that spoke effectively to a variety of target audiences. I was chosen for this position largely because of my musical background and my writing ability.

NOTION Music, Inc. *Order Fulfillment Coordinator*

2006

Highlights of this position included writing an intranet PHP/MySQL database to streamline the process of fulfilling software demo requests. My labors improved productivity at the position twofold. I also learned the NetSuite web sales platform, and trained our sales staff on it. I was Employee of the Month in November.

{skills}

programming

HTML / CSS

PHP / MySQL

C++

Javascript

design software

Adobe Creative Suite

Coda

operating systems

Windows 7 / Vista / XP

Macintosh OS X

other software

{current projects}

A personal portfolio site for an organist

A personal portfolio site for a bassoonist

{selected portfolio}

easternrandolphband.org 2010

A website for a high school band in North Carolina. Includes a back-end interface for entering and editing Events, and an online registration form for a band invitational.

Written using HTML / CSS / PHP / MySQL, Flash, and Javascript

matthewlibera.com 2010

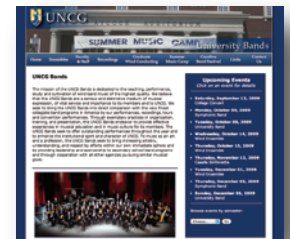

My own personal portfolio, highlighting both my musical and technical backgrounds.

Written using HTML / CSS, and a touch of Javascript.

uncgbands.org 2009

An informational site for the band program at my alma mater. Includes a back-end interface for entering and editing Events.

Written using HTML / CSS / PHP / MySQL, Flash, and Javascript.

vividearthphotography.com 2009

A website for a start-up photography company. Includes a photo database and custom search engine.

Written using HTML / CSS / PHP / MySQL.

liberawebdesign.com 2008

My company website. Includes an extensive login system that allows clients (and designer) to manage projects online from start to finish.

Written using HTML / CSS / PHP / MySQL
